## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 23-31 and 42-44, drawn to a projection apparatus and corresponding method comprising a projection optical system, a first for detecting the energy for detecting the energy and second detecting means for detecting intensity, and a variation detecting means for detecting a variation in an attenuation factor, classified in class 355, subclass 69.
  - II. Claims 32-41, drawn to a scanning exposure apparatus and method having restriction means for restricting of an image projection regions, classified in class 355, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I\_II have separate utilities such as intensity control and restriction of an image projection region based on the exposure energy detected. See MPEP § 806.05(d).

Art Unit: 2851

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
